

Epple Druckfarben AG: Personnel reinforcement of the sales department in Baltic States, Central and Eastern Europe

Neusäß, 12 March 2020

Epple Druckfarben AG, Neusäß, welcomes two new Polish colleagues in the course of its internationalisation. They have taken over central functions in the sales regions of Central and Eastern Europe and the Baltic States as of 2020: Adam Tabor as Area Sales Manager and Sebastian Orliński as Area Technical Manager.

The new Area Sales Manager Central Eastern Europe & Baltics Adam Tabor (43) is the first contact in the region for sales partners such as e.g. Grafikus in Poland. With his branch experience in technology, sales and strategic business development, he is able to perfectly understand customer requirements and advise them. After working as a technician for a renowned printing ink manufacturer, Adam Tabor was appointed Sales Manager for the Eastern European region of to-day's Hi-Tech Chemicals BVBA in 2004.

Epple Druckfarben attaches great importance to technical customer service, for which Sebastian Orliński (42) was won over. He fills the position of Area Technical Manager Central Eastern Europe & Baltics with high competence. The graduate of the Technical University in Warsaw, specialised in printing, was most recently employed as Sales & Service Engineer at Hi-Tech Chemicals BVBA. With his many years of experience, he will contribute to smooth printing processes for customers.

Stefan Schülling, member of the Executive Board Epple Druckfarben AG: "I am pleased that we have been able to recruit such a competent specialist team for sales and application technology for the Central and Eastern European sales region. The customers will benefit greatly from this.

COMPANY INFORMATION

Epple Druckfarben AG stands for unique perfection in every detail. Since 1870, Epple has embodied permanent further development and the highest of quality demands. As the leading producer of offset printing inks, Epple has demonstrated its power of innovation with early development of mineral oil-free eco-series and special types of ink for very long washing intervals in perfecting printing. This has also been demonstrated in the sector of inks for foodstuff packaging with the patented products BoFood® MU and BoFood® Organic. PURE® is setting new standards as a third technology offset ink system, which completely avoids the use of metal dryers or photo initiators. Both sustainability and flexibility in business are top priorities at the medium-sized, family-run company. Unlike practically any other company, Epple is in the position to provide tailor made solutions for the individual requirements of their global customers.
