
PRODUCT INFORMATION

Extrafit Plate Gum Bake 2245

Baking gum for offset printing plates

FIELD OF APPLICATION

- Gumming of positive and negative plates
- Can be used in automatic plate development machines
- For manual gumming
- Protects non-image areas during baking process

PROPERTIES

- Optimum ink acceptance even with negative plates
- No deposits in spray nozzles
- Fast inking even after longer press downtime
- No streaking

APPLICATION

For manual application: Remove water residues from the surface of the plate. Apply Extrafit Plate Gum Bake 2245 thinly evenly and allow to dry. After baking, wash-off with clear water or positive plate developer and apply a high quality finisher.

For machine application in the plate development machine: Dilute Extrafit Plate Gum 2245 in ratio of 50:50 with water.

SPECIFICATIONS

- Stable up to 280 °C (536 °F)

CORRESPONDING PRODUCTS

Waterfit	Fountain additive for maximum productivity due to stable process
Washfit	Excellent wash to reduce paper waster and to realise short washing times

STANDARD PACKAGING

- 5 KGR
- 20 KGR

Note: This technical description is intended to inform and advise you. It corresponds to our current state of knowledge. However, since the specific application depends on a number of factors over which we have no influence, no guarantee and liability for the pressure failure can be derived.
