
PRODUCT INFORMATION

Security Inks - Fluorescent

These inks appear in daylight like normal inks. However, under UV light they show a fluorescent effect in a different colour shade. The colour impression of security inks may vary when using paper with visual brightener.

FIELD OF APPLICATION

These inks can be used in all fields where higher security properties of the printed matters are required.

APPLICATION

Security inks are to be applied like normal conventional inks. Due to their reduced light fastness it is, however, necessary to clarify the field of application in advance.

COLOUR SHADE UNDER UV-LIGHT

77144 strong yellowish glow
77222 orange glow
77145 green-yellowish glow
77146 reenish glow
51934 olive-greenish glow
